

7:00 AM – 8:30 AM General Registration & Convening

7:15 – 8:15 **Private Breakfast** | *Emerging threats in the fight against malaria: Exploring insights, solutions, and challenges*

- Mark Dybul, Director of the Center for Global Health and Quality, Georgetown University Medical Center
- Deena Buford, Global Medical Director, ExxonMobil
- Raj Kumar, President and Editor-in-Chief, Devex
- Attendance to this breakfast conversation is by invitation only. For inquiries, please email events@devex.com.

8:30 AM – 10:30 AM **Main Stage Event: New Tools for Global Development**

- *Fichandler Theater*
- Showcasing transformative leaders (both big names and new faces) developing radically new tools that will shape the way all of us work
 - Raj Kumar, President and Editor-in-Chief, Devex
 - Shivani Siroya, Founder and CEO, Tala
 - Jaha Dukureh, Founder, Safe Hands for Girls
 - Miguel McKelvey, Co-Founder and Chief Creative Officer, WeWork
 - Kami Dar, Executive Vice President and Co-Founder, Devex
 - Maury Blackman, President and CEO, Premise Data
 - Adva Saldinger, Associate Editor, Devex
 - Ray Washburne, President and CEO, Overseas Private Investment Corporation
 - Devry Boughner Vorwerk, Corporate Vice President, Global Corporate Affairs, Cargill
 - Nadia Naviwalla, Devex Special Correspondent
 - Rula Ghani, First Lady of Afghanistan
 - Raquel Alcega, Manager, Development Data, Devex

10:30 AM – 11:00 AM **Networking Break**

- *Innovation Zone & Tech Lab*

11:00 – 11:30 **Vox's Displaced: Live from Devex World**

- *Kogod Cradle*
- Vox's Displaced Podcast is going live from Devex World! Join hosts Ravi Gurumurthy and Grant Gordon for an intimate conversation and live recording with a special guest to discuss the most innovative ways to respond to global crises.

11:00 AM – 12:00 PM **Forum: Innovating at Scale**

- *Kreeger Theater*
- Innovation — It's the most overused word. But scale adds a new dimension that changes the whole idea. Delivering real, measurable change to people in need today by the millions is no buzzword — it's the future of global development and a necessity if we're to reach the Sustainable Development Goals. With a special focus on the challenge of scaling up humanitarian response in a moment of unprecedented crisis and displacement, we'll uncover the opportunities for your mission.
 - Sara Jerving, East Africa Correspondent, Devex
 - Elhadj As Sy, Secretary General, International Federation of the Red Cross
 - Nathaniel Raymond, Director, Signal Program on Human Security and Technology at Harvard Humanitarian Initiative
 - Alex Thier, Executive Director, Overseas Development Institute
 - Gargee Ghosh, Director of Development Policy and Finance, Gates Foundation
 - Pete Troilo, Director, Global Advisory and Analysis, Devex

11:00 AM - 12:00 PM Interactive Workshop: Innovating Through Empathy to Intensify Impact by Innovazing and Mavasive Leadership Institute

- *Rehearsal Room*
- Empathy is the undervalued stock of innovation. When we practice empathy, we are more inclusive of the diversity we strive for. That integration is how innovative ideas and solutions are formed. Through this workshop, you will be empowered with tools to break the mold of stale routine methodologies and learn to make new connections.
 - Saleema Vellani, Co-Founder and COO, Innovazing
 - Rachel An, Mavasive Leadership Institute Faculty Member

12:00 PM - 1:00 PM Forum: From Storytelling to Movement-Building

- *Fichandler Theater*
- In a moment when progress is so often blocked by politics, don't "communicate" at me. Tell me a story. Make it an inclusive narrative that can get us past politicization to action. With a deep dive on what's possible in the education sector, we'll consider a way forward that's not about communications plans or social media strategies but coalitions, community activism, and, ultimately, building a movement.
 - Sophie Edwards, Reporter, Devex
 - Wendy Kopp, CEO and Co-Founder, Teach for All
 - Amel Karboul, CEO, Education Outcomes Fund for Africa and the Middle East
 - Kevin Bleyer, Best-Selling Author and Speechwriter
 - Kate Midden, Engagement Editor, Devex
 - Paul O'Brien, Vice President for Policy and Advocacy, Oxfam America
 - Wil Hylton, Contributing Writer, The New York Times Magazine
 - Alex Cabaret, Associate Director, Partnerships, Devex

12:00 PM - 1:00 PM Facilitated Discussion: Leveraging Private Sector Solutions to Improve Health Care Quality

- Naveen Rao, Lead, Merck for Mothers
- Powered by MSD for Mothers
- Attendance to this roundtable conversation is by invitation only. For inquiries, please email events@devex.com.

12:30 PM - 2:30 PM Munch & Mingle: Open-seating lunch

- *Terrace Cafe*

1:00 - 1:45 A Conversation with Participant Media and the Kailash Satyarthi Children's Foundation

- *Kogod Cradle*
- Powered by Pact
- Did you know that June 12th is also World Day Against Child Labor? Join us for a special session featuring an extended clip of the film *Kailash* - a suspenseful yet intimate look at one man's groundbreaking crusade to liberate every child possible - and a conversation with Holly Gordon, Chief Impact Officer at Participant Media and Anjali Kochar, Executive Director of the Kailash Satyarthi Children's Foundation.
- Karen Hayes, Vice President, Mines for Markets, Pact
- Holly Gordon, Chief Impact Officer, Participant Media
- Anjali Kochar, Executive Director, Kailash Satyarthi Children's Foundation

1:00 PM – 2:00 PM Forum: Data Revolution

- *Kreeger Theater*
- Sensors, imagery, frontline worker inputs, and end-user behavior data is becoming cheap and ubiquitous. We're drowning in data, and there's still a tidal wave yet to come — especially from the frontlines. How can we use data to drive results? We'll consider how a data revolution — if we lead it — can make even the toughest global development challenges tractable.
 - Catherine Cheney, Senior West Coast Correspondent, Devex
 - Ebele Okobi, Head of Public Policy, Africa, Facebook
 - Neal Myrick, Director of Social Impact and Head of the Tableau Foundation
 - Lisha McCormick, COO, Last Mile Health
 - Paul Weisenfeld, Executive Vice President, International Development, RTI
 - Toyin Saraki, Founder-President, Wellbeing Foundation Africa
 - Helen Morgan, Associate Editor, Devex
 - Neelima Grover, CEO/Founder, The QED Group
 - Arnau Rovira, Operations Lead, Development Data

2:00 PM – 3:00 PM Forum: Business Transforming Development

- *Fichandler Theater*
- The intersection of business and global development is rich terrain. We'll mine it together, with a special focus on what's possible in global health. It might just turn out that getting to a big thing like universal health coverage is all about starting small and focusing on the consumer.
- - Jenny Lei Ravelo, Senior Reporter, Devex
 - Mark Dybul, Director of the Center for Global Health and Quality, Georgetown University Medical Center
 - Meg O'Brien, Managing Director, Global Cancer Treatment
 - Dr. Githinji Gitahi, Group Chief Executive Officer, Amref Health Africa
 - Agnes Binagwaho, Vice Chancellor, University of Global Health Equity
 - Karl Hoffman, President and CEO, PSI
 - John Hewko, CEO, Rotary International
 - Alan Robbins, Executive Vice President and Co-Founder, Devex

2:00 PM – 3:00 PM Moving the Needle: Expanding Financial Services to Women Through Technology

- *Kogod Cradle*
- Powered by ExxonMobil Foundation
- Over 1 billion women lack access to financial services due to economic and social barriers, time and mobility constraints, and discrimination in service provision. Financial services delivered digitally can address these barriers by providing women with safe and accessible channels. The Center for Global Development, ExxonMobil Foundation, and Women's World Banking have formed a partnership to research and test the success of projects supporting women's financial inclusion, with a focus on digital technologies, branchless banking, and business skills training. We'll take a close look at what interventions work and core indicators for evaluating the impact of women's economic empowerment projects.
 - Mary Ellen Iskenderian, President and CEO, Women's World Banking
 - Mayra Buvinic, Senior Fellow, Center for Global Development

2:15 PM – 3:45 PM Interactive Workshop: Design-Build Development — The Power of 'Bridging' for Human-Centered Solutions with OpenIDEO & GHR Foundation

Powered by GHR Foundation

Development challenges are complex and interwoven, and cannot be solved in isolation. How might we design and build solutions that bridge the gaps between people, organizations, issues and beliefs to achieve better outcomes? In this fast-paced, hands-on workshop you'll learn and apply the emerging practice of 'bridging' to a real-world challenge and walk away with actionable, human-centered problem solving techniques.

Luisa Covaria, OpenIDEO

Chris Berger, GHR Foundation

3:00 PM – 4:00 PM Forum: New Funding Models

- *Kreeger Theater*
- There's a results revolution coming, and the way development is financed might never be the same. Call it pay-for-performance, development impact bonds, tiered funding, or blended finance. But one thing we should all call it? The future. We'll talk to a band of leaders at the forefront of this revolution to find out what financial innovation might mean for solving the world's toughest challenges — and when it's coming.
 - Adva Saldinger, Associate Editor, Devex
 - Avnish Gungadurdoss, Managing Partner and Co-Founder, Instiglio
 - Neil Buddy Shah, CEO and Co-Founder, IDinsight
 - Pam Foster, Chief Operating Officer, Co-Impact
 - Kanika Bahl, CEO, Evidence Action
 - Dr. Naveen Rao, Lead, MSD for Mothers
 - Alan Robbins, Executive Vice President and Co-Founder, Devex
 - Eric Reading, Executive Vice President, Chemonics
 - Manola de Vos, Project Lead, Survey and Advisory Services

4:15 PM – 6:00 PM Main Stage: A New Way of Thinking about Global Development

- *Fichandler Theater*
- How some of the most prominent leaders, companies, and organizations are driving a whole new approach to development.
 - Carine Umuhumuza, Associate Director for Communications, Devex
 - Malcolm Gladwell, Author
 - Sema Sgaier, Co-Founder and Executive Director, Surgo Foundation
 - Mala Gaonkar, Co-Founder, Surgo Foundation
 - Caroline Roan, Vice President, Corporate Responsibility, Pfizer
 - Raj Kumar, President and Editor-in-Chief, Devex
 - Jude Nwokike, Senior Director, Promoting the Quality of Medicines Program, USP
 - Dr. Tedros Adhanom Ghebreyesus, Director-General of the World Health Organization

6:00 PM – 6:15 PM Closing Performance by Grammy award-winning artist, Thelma Houston

6:15 PM – 7:15 PM Reception: The Year of Women in Global Development

- *Terrace*
 - Kate Warren, Executive Vice President, Devex
 - Sheila Redzepi, Vice President for External and Corporate Relations, World Bank Group
 - Katja Iversen, CEO, Women Deliver

The After Party After Devex World, stroll over to the Pearl Street Warehouse with fellow attendees for light dinner and music – a chance to dance off the day!

- Pearl Street Warehouse,
- 7:30 – 9:30 PM | Light dinner at open bar
- 8:30 PM | Music and dancing
- RSVP [HERE](#)

Throughout the day:

FLASH TALKS

Gather for 10-minute Flash Talks from key voices in our community from stages located in both the Innovation Zone and Tech Lab.

Time	Innovation Zone	DXW Track	Tech Lab	DXW Track
11:10 - 11:25	<p>Ending FGM/Cutting & Child Marriage Through Culture Change <i>Nice Nailantei Leng'ete, FGM Activist (Johnson & Johnson Fellow)</i> In traditional Maasai culture, to be considered a woman, girls between the ages of eight and 12 are expected to go through female genital mutilation/cutting. Once they are cut, girls are expected to leave school, get married and start having children of their own. Through culture change, led by Maasai communities themselves, these harmful practices are beginning to change. Alternative Rites of Passage for girls are replacing female genital mutilation/cutting and child marriage. More and more girls are continuing their education instead of getting married. Change is happening through involvement with the whole community — elders, girls, boys, men, women. Since 2009, in my work with Amref Health Africa, more than 16,000 girls in Kenya and Tanzania have gone through Alternative Rites of Passage without female genital mutilation/cutting.</p>	Story-telling	<p>Mobilizing the Space Data Revolution for Sustainable Development <i>Christoph Aubrecht, European Space Agency Representative to the World Bank, Senior Geospatial Strategist</i> Data is increasingly being recognized at the heart of addressing sustainable development challenges and as foundation of development policy and effective program implementation. Satellite Earth Observation provides an unbiased, consistent and timely perspective that can inform data-driven decision-making. Recent advances in Earth Observation technology and analytical capabilities push the boundaries of development challenges to be addressed at scale. The European Copernicus program and its fleet of Sentinel satellites contribute to these developments providing free and open data at unprecedented scale. Collaborative action and capacity building are key to mainstream these innovations into development operations which the European Space Agency spearheads through its partnership with International Financial Institutions.</p>	Data Revolution
11:35 - 11:50	<p>The Next Generation of Development Professionals <i>Alexis Bonnell, Acting Director, Office of Engagement and Communications, USAID</i></p>	New Funding Models	<p>Women, Girls and the HIV Burden <i>Ntokozo Zakwe, DREAMS Ambassador (Johnson & Johnson Fellow)</i> Women account for more than half the number of people living with HIV worldwide. Young women (10-24 years old) are twice as likely to acquire HIV as young men the same age. HIV disproportionately affects women and adolescent girls because of vulnerabilities created by unequal cultural, social and economic status. This Talk will discuss how an initiative supported by the US Government and other stakeholders providing a holistic approach to addressing issues affecting young women saw about a change in the lives of Girls in Africa.</p>	Story-telling

<p>12:00 - 12:15</p>	<p>Life-Saving Care and Education Bundles for Mothers and Newborns <i>Nayab Ahmad, Barakat Bundle (Johnson & Johnson Fellow)</i></p> <p>Every year almost 5 million infants die and almost 300 thousand women die from causes related to pregnancy and childbirth. Barakat Bundle's life-saving care and education bundles are designed to address the major barriers to care and reduce preventable infant and maternal mortality. Learn how Barakat Bundle has co-created our bundles with local community members including mothers, fathers, and healthcare workers in India and has taken a financially sustainable approach to our work to ensure that every newborn and every mother have an equal access to a healthy start.</p>	<p>Business</p>	<p>Scaling Agriculture Value Chains with Innovative Finance <i>Richard Lackey, Founder & CEO of The World Food Bank</i></p> <p>Across the globe, more than 800 million people are food insecure. The challenge of hunger and malnutrition is epic and cannot be solved by government and philanthropic aid alone. It is essential that the private sector step up to the plate now, alongside governments and NGOs, to become part of the solution. In 2015, Richard Lackey founded The World Food Bank to provide both a new model for governing global food systems and a collaborative, innovative finance platform that catalyzes the investment of much-needed private capital into global food security. The World Food Bank's mission is to revolutionize and bring efficiencies to global agricultural systems by empowering family farmers with the right tools, mobilizing private investments into global agriculture in order to produce great social returns and financial returns for investors, and, ultimately, ending hunger.</p>	<p>New Funding Models</p>
<p>12:25 - 12:40</p>	<p>Real-time, Real-world Data for Global Development <i>Chris Watson, Business Development Manager, Premise Data</i></p>	<p>Data Revolution</p>	<p>Innovating for a Sustainable 4th Industrial Revolution <i>Nate Hurst, Chief Sustainability and Social Impact Officer, HP</i></p> <p>We are on the cusp of a global manufacturing revolution that will fundamentally change how we conceive, design, produce, distribute, and consume nearly everything. The 4th Industrial Revolution is being driven by a suite of new and disruptive technologies, including 3D printing. Nate Hurst, HP's Chief Sustainability and Social Impact Officer, will look into the future as he shares how 3D printing at production scale is poised to help drive both a 4th Industrial Revolution and sustainability revolution, and what this means for global development.</p>	<p>Innovating at Scale</p>
<p>12:50 - 1:05</p>	<p>Rewriting the Rules of Innovation <i>Daniela Termini, CEO of Global Health Corps</i></p> <p>What if the key to innovating at scale is less fast and furious and more slow and steady? Less individual breakthroughs and more collective action? Less silver bullet and more perseverance through the unsexy middle? To solve systemic global development challenges, we first need to rewrite the rules of innovation. This belief is at the heart of the work Daniela Termini is doing as CEO of Global Health Corps, a movement of</p>	<p>Innovating at Scale</p>		

	nearly 1000 bold young health equity leaders. In this flash talk, Daniela will share stories and insights from her decade of experience overseeing global teams working to change the world.			
1:15 - 1:30	<p>Bridging Medical Expertise and Business Acumen <i>Jade Benoit, Sales Force Effectiveness and Account Management Team Lead, US Brands, Pfizer Essential Health</i> <i>Todd Wagner, Managing Director, Eliquis Healthcare Professional Marketing, Pfizer Innovative Health</i></p> <p>Working as a Global Health Team, Pfizer colleagues volunteered with Doctors for You, an India-based medical humanitarian non-profit organization, to share skills and hone business expertise to grow its offerings and support delivery of healthcare services to underserved communities. This FlashTalk will focus on real world examples of skills-based volunteering and the benefits of these unique partnerships.</p>	Business	<p>The Truth About Blockchain Blockchain has become quite the buzzword in the past few months, breaking out of the fintech space and spreading to every industry. Particularly as it relates to international development, commonly referred to in the space as "social impact", blockchain remains a bit abstract and distant. ConsenSys' Ariana Fowler will help to break down the technology, dispel some of the most common myths, and describe what it means for those dedicated to solving global challenges.</p>	New Funding Models
1:40 - 1:55	<p>Tackling Humanitarian Challenges through Innovation <i>Doug Stropes, Deputy Division Director, Humanitarian Policy and Global Engagement Division, USAID</i></p> <p>Humanity, neutrality, impartiality, independence. The humanitarian principles are what grounds humanitarian actors. But what grounds the private sector? Balance sheets and shareholders? In reality, the private sector has a wide array of incentives to engage in humanitarian work, and there's significant shared value with traditional humanitarians at all levels - local, national, and global. From philanthropy to continuity of operations and employee safety, core corporate financial, environmental, and social interests are at stake pre- and post-disaster. With the frequency, scale, and funding needs for responses to disasters and crises increasing, there is a need for engagement with the private sector. Businesses have often been viewed merely as suppliers of goods and services, and occasionally small-scale donors through corporate social responsibility programs. Over the past decade, the private sector has increasingly been recognized as a major stakeholder in multiple areas of humanitarian response. At USAID's Office of U.S. Foreign Disaster</p>	Innovating at Scale	<p>The Power to Reclaim My Voice <i>Unami Jeremiah, Johnson & Johnson Fellow</i></p> <p>Safety and dignity are basic human rights that have to be protected especially for young women because they are vulnerable to being abused. In Botswana where 2 out of 3 women will experience some form of Gender based violence in her lifetime, sexual harassment is one of them. For many young women it is difficult to report sexual harassment when it happens and instead remains a closed-door conversation with friends. Hence, we implemented Project Unbreakable BW as a campaign to sensitize and raise more awareness on sexual harassment as a form of gender-based violence. It was targeting young women in the University of Botswana. This project was founded to lobby for a more comprehensive sexual harassment policy implementation. Although policy alone does not deter the abuse, I believe in the power claiming one's voice to speak up and speak out against this abuse.</p>	Story-telling

	<p>Assistance (OFDA), we are moving beyond traditional private sector partnership models and are looking for ways to co-create sustainable solutions to mutual problems. OFDA sees innovation as one channel to convene, produce and enable meaningful and effective private sector engagement opportunities in humanitarian assistance. Through its Creating Hope in Conflict: A Humanitarian Grand Challenge, OFDA has set out to pilot, test, and scale innovative solutions to the world's most difficult humanitarian challenges in conflict. Central to this program is engagement with the private sector, which can contribute valuable technical expertise, new solutions, risk management, and access to networks and data - just to name a few. By consulting and engaging with companies around select issue areas that speak to core corporate interests, innovative solutions are more likely to reach scale, impact, and long-term sustainability. Furthermore, co-investments (both financial and non-financial) in innovation can serve to address mutual barriers to entry, build technical response capacity, enhance organizational operations, and translate lexicons, which all contribute to building long-term public-private engagement in order to save lives.</p>			
<p>2:05 - 2:20</p>	<p>Confessions of a Corporate Insurgent <i>Gib Bulloch, Independent Consultant, Writer, Speaker</i></p> <p>Today, over half of the largest economies in the world are global businesses - controlled by the few, and impacting the many. Business clearly has the power to change the world - but what if we, as individuals, had the power to change the world of business? For over a decade, Gib Bulloch led a corporate "guerrilla movement" within one of the world's largest global consulting organisations. Plaudits, prizes and promotions followed. But success came at a price: It ultimately cost him his job, his health and perhaps even his sanity. But is it really so crazy to suggest that business has a role to play in solving the challenges of global development? Or to believe that the SDGs might actually be business opportunities in disguise? This talk is a call to action for all aspiring social intrapreneurs inside large organisations, to find your purpose even if to others, it may seem like you've lost your mind.</p>	<p>Business</p>	<p>Tracking Development Data: Challenges and Innovations <i>Matt Wolf, Development Analyst, Devex</i></p>	<p>Data Revolution</p>

2:30 - 2:45	<p>In the Frontline of Community Health <i>Jack Hisard, Executive Director of Mama Clinic (Johnson & Johnson Fellow)</i></p>	Innovating at Scale	<p>Accelerating Development with AI & Satellite Imagery <i>Jeremy Hale, Global Development Manager, Digital Globe</i> Visualize how our world is built and changing over time with the first (and only) global building footprint extraction product that employs the most advanced high-resolution satellite imagery, artificial intelligence and cloud compute power available.</p>	Data Revolution
2:55 - 3:10	<p>Why We need a Data Revolution in Land <i>Karol Boudreux, Women's Land Rights Director, Landesa</i> The land sector is tied in critical ways to many development objectives. Over the past decade practitioners and researchers have examined linkages between secure rights to land for women, men and communities and outcomes such as agricultural productivity, deforestation, conflict and women's empowerment. Land also plays an important role in the SDGs and the 2030 Agenda, as several Goals call on states to measure progress related to land documentation and/or perceptions of tenure security. This is important progress however, the land sector suffers from a significant data gap, which constrains our ability to develop targeted interventions to achieve development goals. This talk will briefly explore the state of our knowledge about land holding, identify why we have a major knowledge gap in this sector and what the implications of this gap are, and then highlight some exciting projects and activities that are helping expand our understanding of who owns, controls and uses the world's land.</p>	Data Revolution	<p>Innovating to Bring Clean, Sustainable Water to the Masses <i>Sandy Hwang, VP of Business Analytics and Development, Safe Water Network</i> Safe, clean drinking water is a basic human right, and yet billions around the world don't have access, largely because it is difficult to walk the balance between maintaining financial viability of water treatment and offering affordable pricing to those who need it most. This flash talk will take the audience on Safe Water Network's journey to achieve this goal at scale. We will share how we use our portfolio of 300+ stations — and growing — as a living lab, leveraging technological innovations from one part of the world (e.g. solar, ATMs, cloud-based data management systems), to bring safe and sustainable water access to 1M+ people living below the poverty line in Ghana and India.</p>	Innovating at Scale
3:20 - 3:35			<p>Mobilizing Leaders Through Education <i>Maimuna Ahmad, Founder and CEO, Teach for Bangladesh</i></p>	Story-telling
3:45 - 4:00	<p>A Collective Vision for Human-Centered Design in Global Health <i>David Milestone, Acting Director, USAID Bureau for Global Health's Center for Innovation and Impact (CI)</i> Design has the potential to address a number of challenges that are critical to achieving the SDG's. However, the global health community needs to work together to mainstream its use to unlock this opportunity. With this in mind, USAID and the Bill & Melinda Gates Foundation convened a cross-section of design service firms, funders, and program implementers to discuss challenges and design a collective path forward. Since then, we have co-created a set of public goods to provide</p>	Innovating at Scale	<p>Nutritious Delicious Meals for Pennies: A World Beyond Food Aid <i>Taylor Quinn, Emerging Markets Director, JUST</i> Today in Liberia, moms can now afford to buy nutritious delicious food in their local markets. JUST has built a model that's owned and operated by Liberian small businesses, who are producing a line of fortified cassava-based porridge that is sold to school feeding programs, hospitals, and in open-air markets - cheaper than the cheapest Liberian food.</p>	Business

	practical guidance and a vision for design in global health. This talk will describe this journey, public goods, and provide details on the upcoming launch of this work in late June.			
--	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--	--	--

TECH LAB

Roll-up your sleeves and get your hands on the latest tech, alongside your fellow development gearheads in the Tech Lab. This zone of the conference is sponsored by the satellite company **DigitalGlobe** and the visualization software company **Tableau** – both of whom will offer demonstrations of their technologies for humanitarian and development efforts. You'll also get to check out VR experiences by Facebook's virtual reality business **Oculus** and, taste test fortified porridge from **JUST**, a food tech startup making waves in Liberia, and learn more from **Consensys** about how blockchain technology can impact our work in global development.

INNOVATION ZONE

Mingle and chat in the grand lobby Innovation Zone while taking an up-close look (and maybe even a tweetable pic) at the latest innovations from our partners **Cargill**, **Pfizer**, **United States Pharmacopeia**, and **Premise**.
